

WHO WE ARE  
learn more about Végéphyll

# Our history:

AFIP : French interprofessional association for training and improvement in phytopathology and phytopharmacy

AFPP : French association for crop protection

ANPP : National association for crop protection

COLUMA : French weed management commission

SFPP : French society for phytiatrics and phytopharmacy

# Our mission:

« promoting scientific exchanges and information based on reliable references and the experience of our members, in order to protect plants sustainably for the benefit of mankind and his food. »

# Our missions:

Being a proactive player in changes to cropping systems

Providing farmers with reliable information to support them in adapting their cropping systems

Developing methods adapted to the future of agriculture

# Our values:

## Quality

Communication of  
reliable information and  
references discussed

## Neutrality and impartiality

An independent  
structure, democratic and  
with a transparent  
functioning

## Volunteer expertise

An Association gathering  
French experts with  
complementary skills in  
plant health

# Why join us?

- To be connected with agricultural experts keen to promote scientific discussions and work
- To reflect on and contribute to new approaches in agriculture
- To share your own experience and learn from the others
- To optimize your skills

# Our organization :

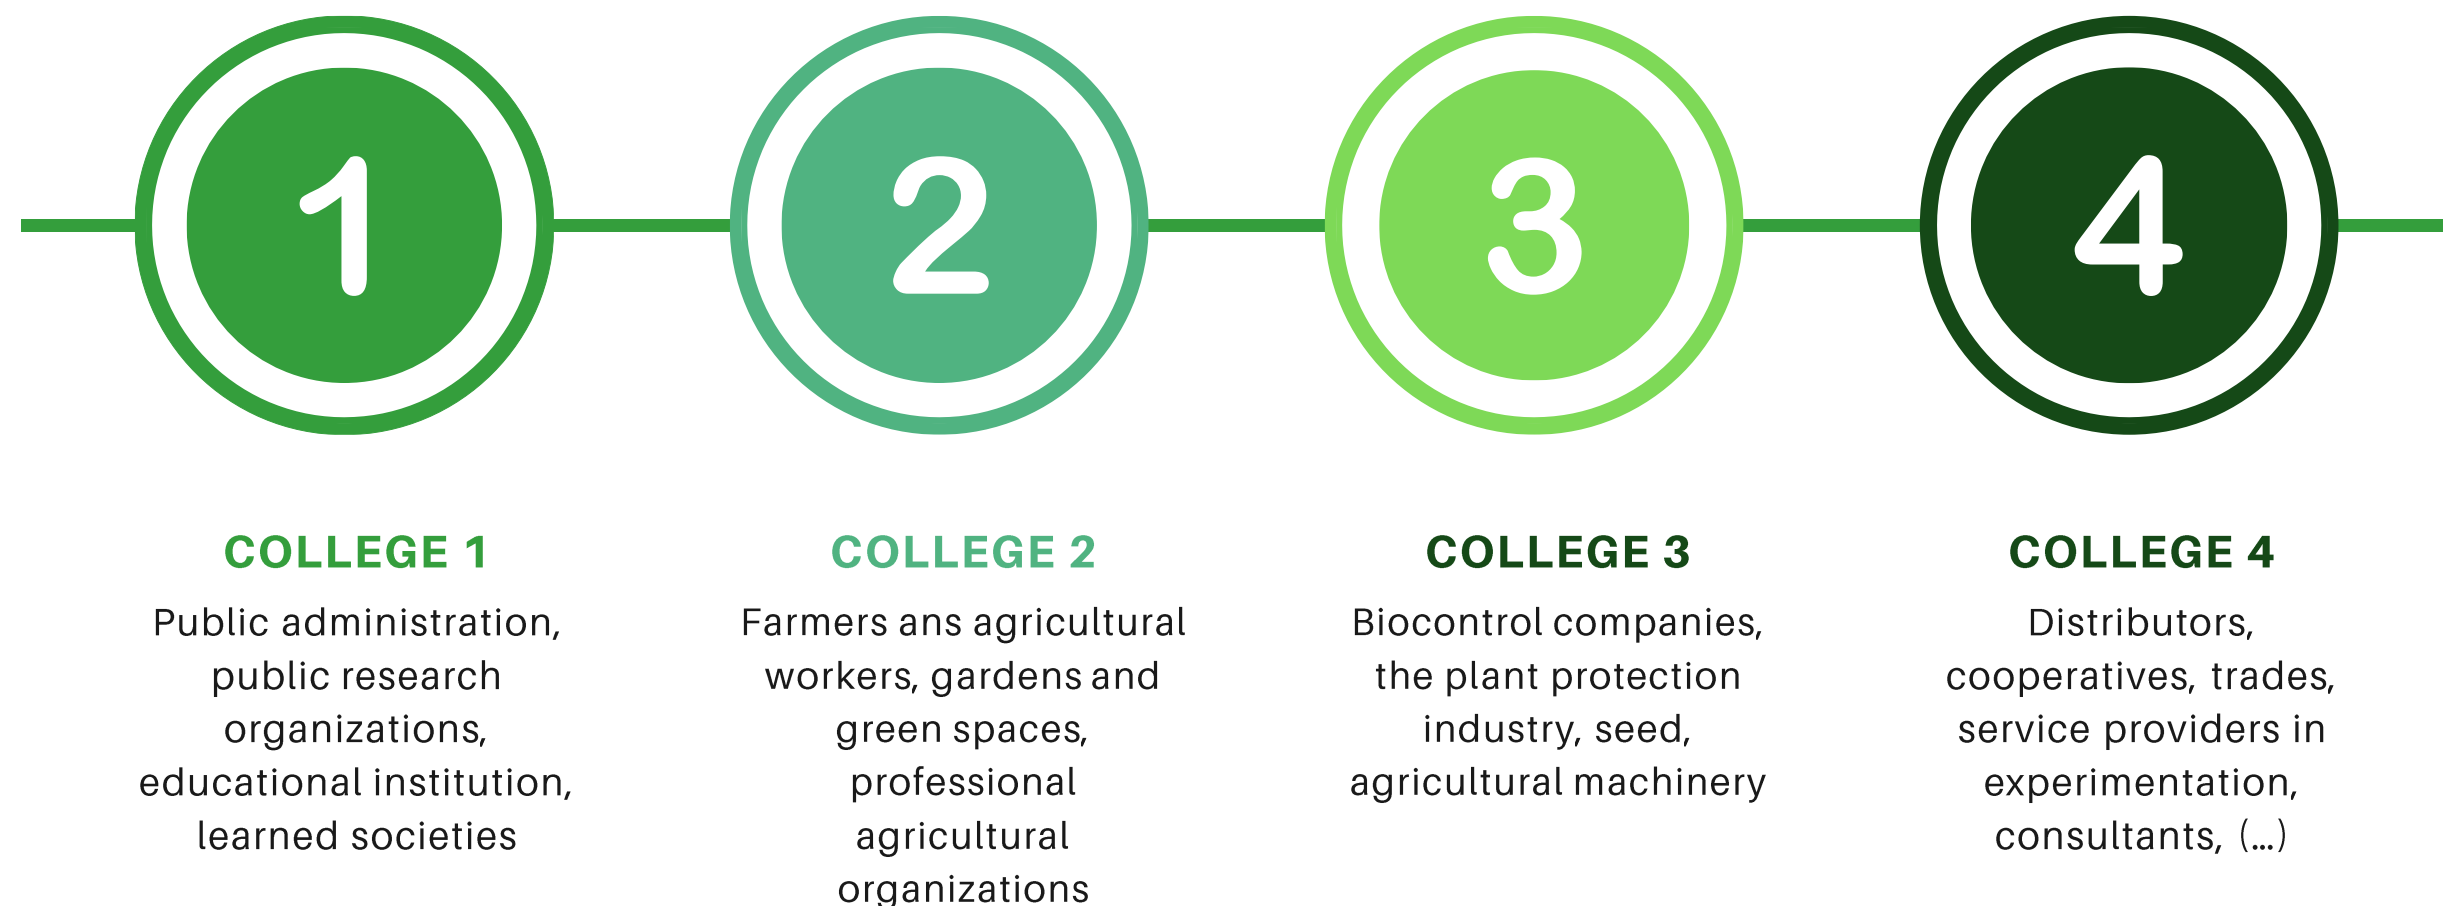

**ASSOCIATION**  
400 members divided into 4 colleges

## GOVERNANCE

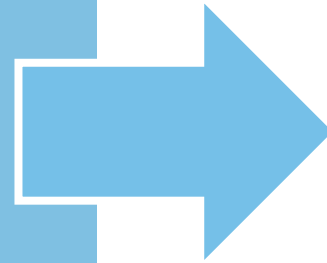

4 professional colleges covering the plant health sectors.  
1 administrative council: 36 members from the 4 colleges (9 members per college), elected for 3 years, renewed by thirds every year.

# Our organization:

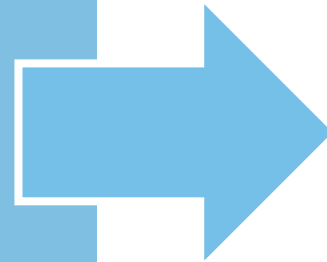

## OFFICE

### **Executive committee is elected each year by the Administrative council:**

1 President  
4 Vice-presidents (1 member per college)  
1 General secretary  
1 Treasurer  
5 members

## THE SUPPORT SERVICE (EMPLOYEES)

Alice Baudet

Director

Maryvonne Gandon

Administrative  
and  
accounting  
manager

# Our goals:

## Plant health

Broaden our skills in crop protection by integrating the agro-ecological dimension and seeds.

## Registration

Supporting and anticipating regular changes in plant health.

## Technical knowledge of actors in the field

Provide technical and regulatory knowledge to field workers for supporting the agro-technical transition.

## Agronomy

Participate in the redeployment of research results toward more agronomic approaches.

# Our conferences:

« Disseminate  
and highlight  
information on  
plant health. »
